Stepic

Setup Guide

## Table of content

Introduction

Stepic for Live comes with its own installers for Mac and Windows. It's included in the ZIP file you downloaded from the server or the purchase receipt. The installer copies all necessary files to their required locations. Follow each step carefully to ensure you can start using Stepic as quickly as possible.

Preparations

Before you can install Stepic for Live, you must have downloaded the ZIP file from your account or via the link in your purchase receipt.
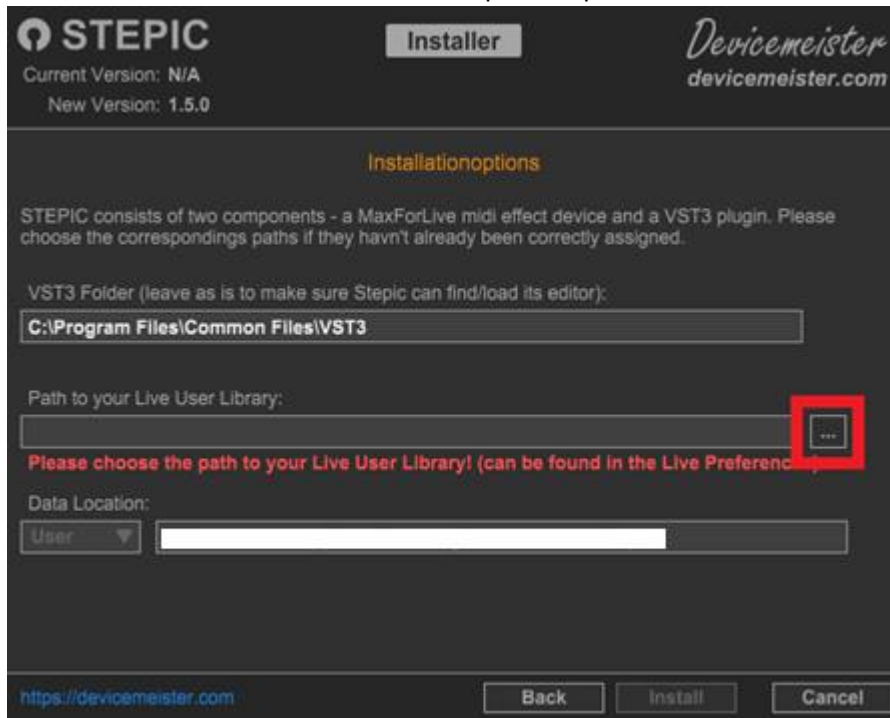

Setup

1. Start Ableton Live.
2. Open the Live Preferences, switch to the "Library" tab and note down the path to your User Library.

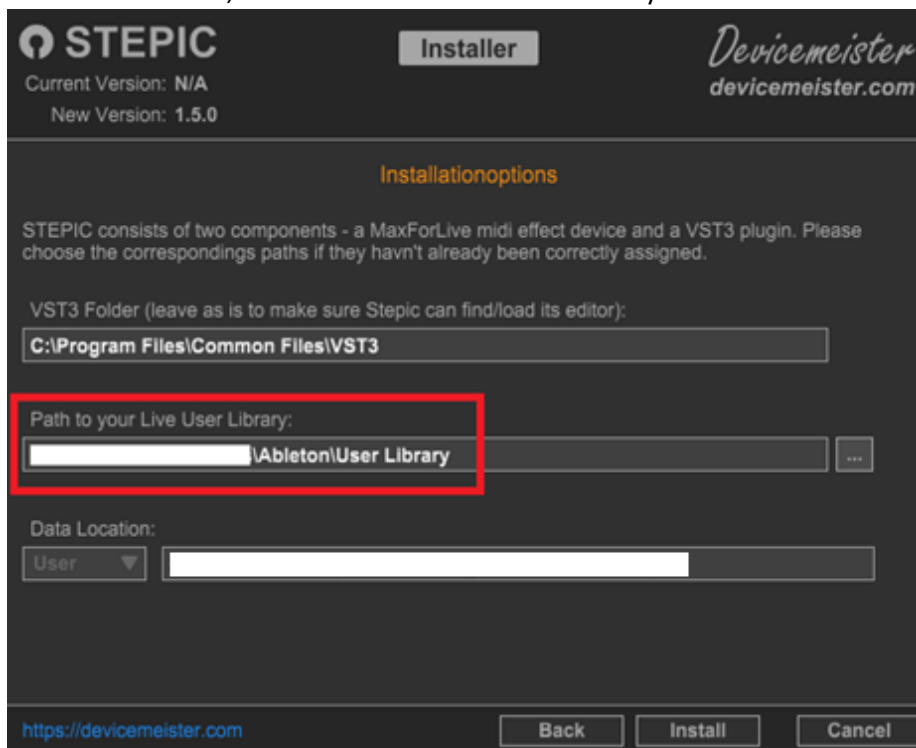

3. Close Live.
4. Launch the Stepic for Live installer.
   on macOS: Stepic4Live_Installer_Mac_x64.app
   on Windows: Stepic4Live_Installer_Win_x64.exe
5. Navigate forward to the Options page.

6. Click the button with the three dots to open the path selection.

7. Now select the path to your User Library.
8. After the selection, the installer will indicate whether you have selected a valid path.
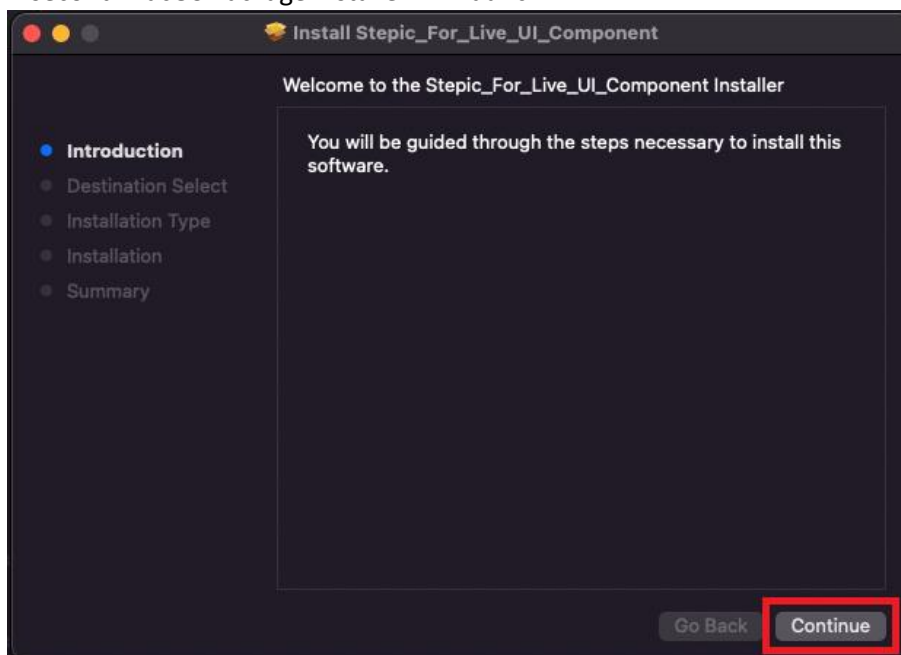

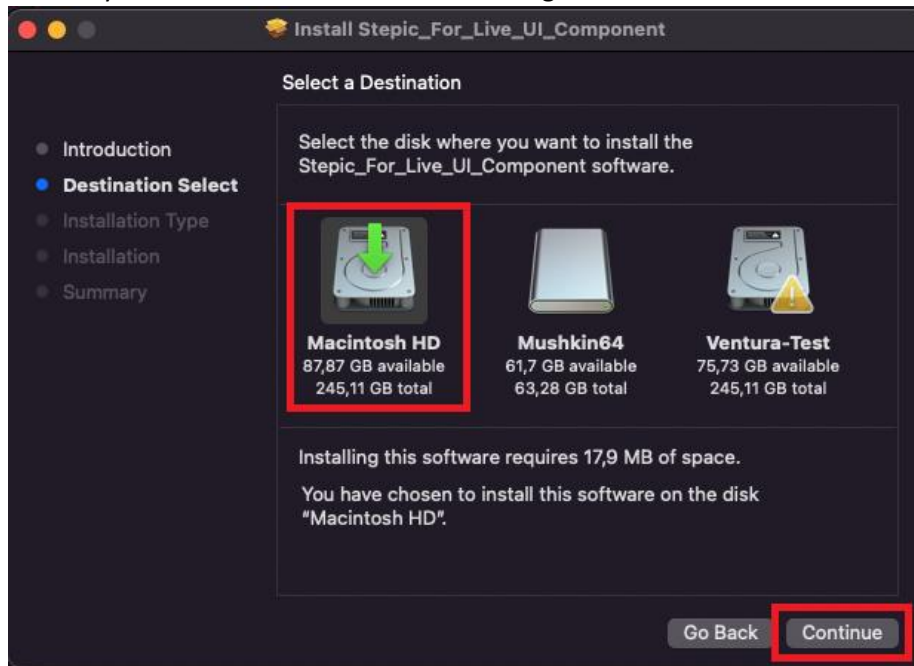

9. Click Install to install Stepic for Live.

10. **For macOS users only (Windows users can continue with step 16):**
11. A second macOS Package installer will launch.

12. Choose your local drive as the installation target.

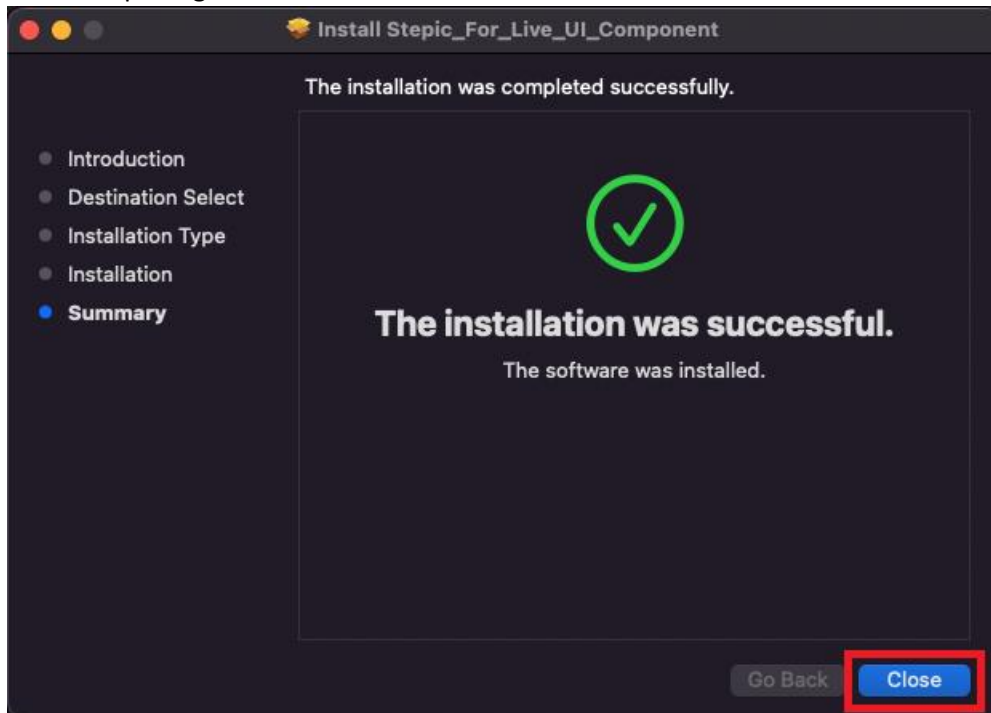

13. If your Mac asks for permission to access the Documents directory, allow it.
14. Enter your system password in the password prompt.

15. Close the package installer.

16. Finish the Stepic for Live installer.

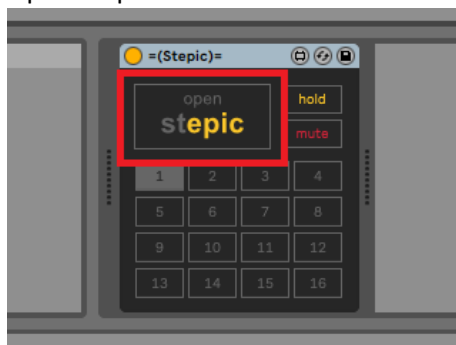

17. Start Live.

18. Navigate in the Live browser to Max for Live -> Max MIDI Effect.

19. Load Stepic's Max Device =(Stepic)=.amxd into a MIDI track.

20. Open Stepic's main UI window with the "open stepic" button.

21. Open Stepic's Application Information via the i-icon.

22. Enter your Stepic for Live license key into the text field. You can also use the clipboard and copy & paste for this.

23. Click on "Activate".

24. Congratulations! Stepic is now ready to use.
